- 5.2 AI Proposal Generation & Approval Lifecycle
- 5.3 Inbound Messaging Triage & 24/7 Auto-Reply Workflow
- 5.4 Supplier Procurement & Financial Settlement
- 5.5 VIP Execution, Celebrations & Post-Trip Feedback

6. AI Governance, Security & Best Practices

7. Frequently Asked Questions & Troubleshooting

1. Executive Summary & Platform Architecture

Welcome to the official operational manual for the **Lanai Lifestyle Intelligence Platform**. Lanai is a state-of-the-art, full-service luxury travel and lifestyle concierge workspace designed to synthesize high-touch human relationship management with cutting-edge artificial intelligence.

Whether you are a product owner operating Lanai as your flagship software product, a concierge advisor managing high-net-worth members, or a platform administrator, this document provides complete, transparent clarity on every feature, workflow, backend component, and user experience built into the platform.

1.1 Product Vision & Core Mission

Luxury concierge management relies on speed, hyper-personalization, zero error tolerance, and discreet communication. Lanai replaces fragmented tools (spreadsheets, messaging apps, manual document creators) with a unified ecosystem that handles client management, travel itineraries, multi-channel communications, supplier partnerships, billing, and AI co-pilots in a single workspace.

**High-Touch Human Centricity**

AI acts strictly as an intelligence co-pilot. Every proposal, message draft, and financial invoice remains under total advisor control before final client delivery.

**24/7 Instant Client Responsiveness**

An automated 24/7 AI Concierge ensures member inquiries receive warm, immediate responses at any hour without leaving clients waiting.

1.2 Dual-Portal Architecture

The platform maintains strict separation between operational management and the client experience through two distinct interfaces:

Portal Component	Primary Audience	Primary Capabilities & Purpose
Advisor Portal	Concierge Advisors, Management, Finance, Operations	Full CRM oversight, travel request pipeline, AI proposal co-pilot, morning briefings, supplier catalog, WhatsApp triage, invoicing, revenue analytics, and system administration.
Member Portal (Client Suite)	High-Net-Worth Members & VIP Clients	Private trip dashboard, interactive proposal review & approval, document vault, billing history, bespoke preference management, and 24/7 direct messaging.

1.3 Component Architecture & Multi-Tier Infrastructure

The platform runs on a robust microservices architecture engineered for privacy, security, and low latency:

- **Application Layer** (`lanai-portal`): Built with React 18, Vite, TypeScript, Tailwind CSS, and Express backend with tRPC type-safe API communication.
- **Intelligence Layer** (`lanai\_ai`): Python microservices powering AI proposals, client intelligence scoring, morning briefing digests, and WhatsApp message triage.
- **Database & CRM Sync**: Central PostgreSQL instance running Drizzle ORM, connected via bi-directional engine to **Twenty CRM** (open-source luxury CRM).
- **Security Gateway**: Two-tier ingress topology featuring **Caddy Edge Gateway** (auto TLS, HTTP/3) and **APISIX API Gateway** with **OpenAppSec ML WAF**.

2. Getting Started & Authentication

Access to the Lanai platform is segregated by role and protected by enterprise-grade single sign-on and pin security.

2.1 Access URLs & Domain Architecture

Environment Endpoint	Target Service / UI	Authentication Method
https://lanai.example.com/	Advisor Command Center	Keycloak SSO (OAuth2 / OIDC)
https://lanai.example.com/client	Member Client Portal	Email + 4–12 Digit Secure PIN
https://inbox.lanai.example.com/	Chatwoot Unified Inbox	Chatwoot Advisor Credentials
https://admin.lanai.example.com/	Platform Infrastructure Admin	Keycloak Admin SSO Guard

2.2 Advisor Authentication Workflow

1. Navigate to the Advisor Portal root URL. If unauthenticated, you will see the Lanai Sign-In screen featuring the brand gold crown mark.
2. Click **Sign In** to initiate the Keycloak OIDC authentication flow.
3. Enter your assigned corporate email address and password.
4. Upon successful authentication, Keycloak issues a secure session token and redirects you to the **Advisor Dashboard** (` `).

 **Password Policy & Session Expiry**

Advisor sessions are protected by server-side Keycloak policies. Passwords must be at least 12 characters. Inactive sessions automatically expire after 8 hours of inactivity.

2.3 Member Onboarding & PIN Access Security

Clients access their private portal without cumbersome passwords, utilizing an ultra-secure, friction-free PIN system:

Member Onboarding Sequence

- 1 Advisor Invitation:** Concierge advisor creates the member profile in the Advisor Portal and clicks "Send Portal Invite".
- 2 Email Link:** The member receives a personalized invitation email with a secure link to `/client/onboard`.
- 3 PIN Setup:** The member chooses a confidential 4 to 12-digit personal PIN and confirms their profile details.
- 4 Instant Login:** Moving forward, members simply visit `/client`, enter their email and PIN, and instantly enter their Trip Dashboard.

2.4 User Interface Layout & Workspace Navigation

The Advisor Portal utilizes an ergonomic left-hand sidebar navigation partitioned into six distinct functional groups:

1. Overview

- Dashboard (``/``)
- Morning Briefing (``/briefing``)
- Revenue Analytics (``/analytics``)

2. Client Management

- Clients CRM (``/clients``)
- Members Base (``/members``)
- Travel Requests (``/travel-requests``)

3. AI Intelligence

- Proposal Engine (``/proposals``)
- Client Intelligence (``/intelligence``)

4. Operations

- Suppliers Catalog (``/suppliers``)
- Supplier Services (``/supplier-services``)
- WhatsApp AI (``/whatsapp``)
- Unified Inbox (``/inbox``)
- Task Templates (``/task-templates``)

5. Finance & Feedback

- Invoicing (``/invoicing``)
- NPS & Feedback (``/nps``)
- Celebrations Tracker

6. System

- Member Portal Admin (``/member-management``)
- CRM Sync (``/crm-sync``)
- Settings (``/settings``)

3. Advisor Portal: Module & Feature Guide

This section details every page and tool available in the Advisor Portal, outlining how advisors and management should utilize them in daily operations.

3.1 Executive Dashboard (`/`)

The primary control panel providing real-time operational metrics fetched live from Twenty CRM and the postgres database:

- **Total CRM Clients:** Overall contact directory count.
- **Active Travel Requests:** The live pipeline of ongoing client trip inquiries.
- **Active Tiered Members:** Count of active Platinum, Gold, and Silver members.
- **Pipeline Value (\$):** Calculated total gross value of active trip opportunities.
- **Quick Actions Bar:** One-click buttons to create new clients, log travel inquiries, generate AI proposals, or inspect urgent messaging alerts.

3.2 AI Morning Briefing (`/briefing`)

Designed to be an advisor's first stop every workday morning. The AI service scans the advisor's client portfolio and generates a structured daily digest:

- **Priority Follow-Ups:** Highlighted client inquiries requiring immediate attention.
- **Upcoming Travel & Departures:** Clients travelling within the next 48 to 72 hours requiring pre-departure verification.
- **Special Dates & Celebrations:** Upcoming member birthdays or anniversaries for gift dispatch.
- **AI Recommendation Summary:** Suggested daily outreach tasks to drive client retention.

3.3 Client CRM Directory (`/clients`)

The centralized database of all relationship records. Lanai utilizes a **5-Layer Profile System** for every client:

1. **Basic Contact Information** (Name, email, phone, corporate affiliation, social handles).
2. **Travel & Lifestyle Preferences** (Cabin class, preferred hotel brands, seating, dietary restrictions).
3. **Family & Network Graph** (Spouse, children, executive assistants, companion profiles).
4. **Financial & Tier Status** (Lifetime spend, credit status, membership tier).
5. **Interaction History** (Complete log of past trips, requests, messages, notes, and feedback scores).

3.4 Member Directory & Tier Management (`/members`, `/member-management`)

Dedicated tracking for active membership subscription tiers:

Membership Tier	Service Level Agreement (SLA)	Dedicated Benefits
BESPOKE / PRIVATE	15-Minute Instant Response	24/7 Dedicated Senior Concierge, Private Jet Priority, Bespoke Itineraries
PLATINUM / ELITE	1-Hour Guaranteed Response	VIP Hotel Upgrades, Complimentary Airport Transfers, Special Amenities
GOLD / CLUB	4-Hour Guaranteed Response	Curated Proposal Engine Access, Preferred Partner Rates, Priority Booking

3.5 Travel Request Pipeline (`/travel-requests`)

The visual Kanban & table pipeline tracking client journeys across 5 operational stages:

Advisors can click into any request to view parameters: destination, travel dates, passenger counts, budget allocations, cabin/accommodation preferences, and special occasion notes.

3.6 Generative AI Proposal Engine (`/proposals`)

The flagship co-pilot tool that turns complex client briefs into luxury itineraries in under 2 minutes:

Input Parameters

Select Client & Request → Set Destination & Dates → Define Budget & Vibe (e.g. "Secluded Romance", "Ultra-Luxe Adventure") → Include Specific Supplier Preferences.

AI Generated Outputs

- Executive Summary & Narrative
- Day-by-Day Morning/Afternoon/Evening Itinerary
- Handpicked Accommodations & Villas
- Estimated Total Investment Breakdown
- Explicitly Labeled Assumptions & Next Steps

Proposal Publishing & Client Delivery

Once satisfied with the AI draft, advisors click "**Publish to Client Portal**". The proposal immediately appears in the member's private portal with interactive accept/request revision controls.

3.7 Client Intelligence Hub (`/intelligence`)

An automated diagnostic engine that analyzes member records to surface actionable business intelligence:

- **Opportunity Surfacing:** Detects travel patterns (e.g. "*Client booked Mediterranean yacht charter every July for past 3 years — propose 2027 options now*").
- **Risk & Gap Alerts:** Identifies missing preferences or expired passports (e.g. "*Missing passport expiration date for spouse*").
- **Sentiment Analysis:** Aggregates client feedback from past trips to ensure continuous improvement.

3.8 Vetted Supplier & Experience Catalog (`/suppliers`, `/supplier-services`)

A global directory of verified luxury partners across 6 core categories:

- **Hotels & Resorts** (Belmond, Rosewood, Aman, Four Seasons, Claridge's).
- **Private Aviation** (NetJets, VistaJet, GlobeAir).
- **Yacht Charters** (Superyachts, Catamarans, Sailing Vessels).
- **Villas & Private Estates** (Amalfi, St. Barts, Aspen, Tuscany).
- **Chauffeur & Transfers** (Luxury SUVs, Helicopter Transfers).
- **VIP Experiences** (Private Museum Tours, Michelin Chef Dining, Event Access).

Each supplier entry tracks commission percentages, key contact managers, preferred rates, and advisor ratings.

3.9 Multi-Channel Operations & 24/7 AI Concierge (`/whatsapp`, `/inbox`, `/chatwoot`)

Unified communication management across WhatsApp, email, and member portal chat:

WhatsApp & Portal Message Processing

- 1 Inbound Message Ingestion:** Client sends a WhatsApp or portal message.
- 2 AI Triage & Sentiment Analysis:** The AI microservice categorizes intent (Booking Inquiry, Change Request, General Question), assigns urgency (Low, Normal, VIP Urgent), and gauges sentiment.
- 3 24/7 Automated Concierge Reply:** For member portal messages, the system automatically sends a personalized AI reply within seconds to reassure the client, while flagging the thread for advisor review.
- 4 Advisor One-Click Draft Approval:** In the Unified Inbox (`/inbox`), advisors view suggested AI responses, edit if necessary, and dispatch with a single click.

3.10 Invoicing & Supplier Commissions (`/invoicing`)

Full financial lifecycle management for client trips and B2B supplier commissions:

- **Client Invoices:** Itemized trip invoices showing accommodation, experiences, concierge fees, tax, and total due. Integrated with **Stripe Payment Gateway** for online credit card and wire settlement.
- **Supplier Commission Invoices:** Automated tracking of commission receivables owed to Lanai by hotels, yacht brokers, and jet operators upon trip completion.
- **Status Tracking:** Visual indicators for `Draft`, `Sent`, `Paid`, and `Overdue` invoices.

3.11 Member Celebrations & NPS Tracking (`/member/:id/celebrations`, `/nps`)

- **Celebrations Engine:** Tracks member birthdays, wedding anniversaries, milestone achievements, and family dates. Provides automatic reminder alerts 14 days prior, along with curated gift recommendations (e.g. Vintage Champagne, Floral Displays, Personalized Leather Goods).
- **NPS & Feedback Hub:** Post-trip automated Net Promoter Score (NPS) surveys (1–10 rating + qualitative comments). Allows management to track advisor performance and resolve client concerns instantly.

3.12 Financial Analytics & Automation Templates (`/analytics`, `/task-templates`)

- **Revenue Analytics (`/analytics`):** Visual breakdown of gross revenue, net commission margins, revenue by business unit (Travel, Events, Lifestyle), and top client spenders.
- **Task Templates (`/task-templates`):** Standardized concierge operational checklists (e.g. *"Pre-Departure 72h VIP Checklist"*, *"Private Jet Departure Protocol"*) ensuring uniform service excellence across all advisors.
- **Interactive Trip Timeline (`/trip-timeline`):** Visual gantt chart of client itineraries for real-time tracking during travel execution.

3.13 System Configuration & CRM Synchronization (`/settings`, `/crm-sync`)

- **CRM Sync Engine (`/crm-sync`):** Displays real-time synchronization health between the Lanai Portal database and Twenty CRM. Features manual force-sync buttons, error log inspection, and field mapping controls.
- **System Settings (`/settings`):** Advisor profile management, AI prompt configuration, notification preferences, and API key management.

4. Member Portal (Client Private Suite) Guide

The Member Portal is a bespoke, luxury-branded web application accessible via mobile or desktop browsers, giving VIP clients complete visibility and control over their travel portfolios.

4.1 Member Authentication & Trip Dashboard (`/client/dashboard`)

Upon entering their email and PIN at `/client`, members land on their personalized dashboard showing:

- **Active & Upcoming Trips:** Countdown cards featuring destination imagery, travel dates, and current status (e.g. *"Confirmed — Departure in 12 Days"*).
- **Quick Action Vault:** Immediate access to travel documents, flight vouchers, and digital itineraries.
- **Dedicated Advisor Contact Card:** Photo, phone, email, and direct chat button for their assigned concierge advisor.

4.2 Proposal Review & Interactive Itineraries (`/client/proposals/:id`)

When an advisor publishes an AI-crafted proposal, the member receives a notification link to view an elegant presentation:

- **Hero Destination Overview:** Curated narrative of the bespoke journey.
- **Interactive Day-by-Day Breakdown:** Highlighting recommended accommodations, private transfers, dining reservations, and curated experiences.
- **Investment Summary:** Transparent breakdown of costs and included amenities (e.g. complimentary breakfast, resort credits, room upgrades).
- **One-Click Action Buttons:**
 - **APPROVE & BOOK JOURNEY** — Confirms proposal and prompts invoice generation.
 - **REQUEST ADJUSTMENTS** — Opens a direct chat window with pre-filled feedback.

4.3 Travel Document Vault & Financial Billing (`/client/billing`)

- **Document Vault:** Secure repository containing PDF itineraries, airline e-tickets, hotel confirmation vouchers, passport copies, and travel insurance policies.
- **Billing History (`/client/billing`):** Members can view open invoices, past payment receipts, payment methods, and settle balances securely via integrated card processing.

4.4 Bespoke Preference Management (`/client/profile`)

Members can update their personal preferences anytime to ensure every trip is tailored to their exact standards:

Aviation & Room Preferences

- Preferred Airlines & Cabin Class (First / Jet Charter)
- Seating Preferences (Window / Aisle / Suite)
- Hotel Room Category (Penthouse / Villa / Suite)
- Bedding & Pillow Menu Selections

Dining & Lifestyle Preferences

- Dietary Restrictions & Allergies
- Favorite Wine, Champagne & Spirits
- Favorite Luxury Hotel Brands & Destinations
- Emergency Contact & Passport Details

4.5 Instant 24/7 AI Concierge Messaging

Members can message their advisor directly through the portal chat interface. Powered by the 24/7 AI Concierge engine:

- Members receive a warm, helpful, personalized AI response within seconds — ensuring no message goes unanswered late at night or across time zones.
- The message is simultaneously flagged in the advisor's Unified Inbox for human review and personal follow-up.

5. End-to-End Operational Workflows

This section outlines step-by-step operational workflows covering complete end-to-end scenarios within the platform.

5.1 Lead Intake to Qualification & Member Setup

Workflow 1: New Inquiry Intake & Onboarding

- 1 Inquiry Ingestion:** A new lead arrives via website form, email, or WhatsApp message.
- 2 CRM Auto-Creation:** The backend automatically logs the contact in Twenty CRM and displays it in the **Clients Directory** (`/clients``).
- 3 Advisor Assignment & Tiering:** Management assigns an advisor and designates the membership tier (e.g. Platinum).
- 4 Portal Onboarding:** Advisor clicks *"Send Portal Invite"*. The client sets their secure PIN and accesses the Member Portal.

5.2 AI Proposal Generation & Booking Lifecycle

Workflow 2: End-to-End Travel Request & Proposal Delivery

- 1 Log Travel Request:** Advisor logs a request in `/travel-requests` (e.g. *"10-Day Amalfi Coast Superyacht Charter & Villa Stay for 6 Guests, \$120k Budget"*).
- 2 Run AI Proposal Co-Pilot:** Advisor opens `/proposals`, selects the request, and clicks **"Generate Proposal"**. The AI generates a full day-by-day itinerary and investment breakdown in ~90 seconds.
- 3 Advisor Customization:** Advisor reviews the draft, adjusts specific villa choices, and attaches supplier commission rates.
- 4 Client Portal Publishing:** Advisor clicks *"Publish to Client Portal"*. The member receives an automated notification link.
- 5 Member Approval & Invoicing:** Member approves the proposal in `/client/proposals/:id`. The status in `/travel-requests` updates to **BOOKED** and a draft invoice is generated.

5.3 Multi-Channel Messaging & 24/7 AI Auto-Reply

Workflow 3: Inbound Messaging & AI Triage Execution

- 1 Inbound Message:** Member sends a WhatsApp message: *"Can we change our flight departure from 10am to 2pm tomorrow?"*
- 2 AI Triage Engine:** Categorizes intent as **Flight Modification**, urgency as **High / Urgent**, and flags the advisor in the Unified Inbox (`/inbox`).
- 3 Draft Reply Generation:** The AI drafts a professional response checking airline fare rules and availability.
- 4 Advisor Dispatch:** Advisor reviews the suggested draft, confirms availability with the aviation desk, clicks send, and updates the trip timeline.

6. AI Governance, Security & Best Practices

The Lanai platform enforces strict AI governance rules to protect luxury brand reputation and client data privacy:

Core AI Principles & Safeguards

1. **Human-in-the-Loop Supremacy:** Artificial intelligence NEVER sends external client proposals, emails, or booking confirmations without explicit human advisor approval.
2. **No Factual Fabrication (Anti-Hallucination):** The AI is strictly instructed to label unverified details as *"Assumptions — Pending Supplier Confirmation"*. It will never fabricate confirmed flight numbers or live hotel rates.
3. **Server-Side Data Privacy:** Client financial data and preferences are stored securely server-side in PostgreSQL. Raw database access is never exposed to browser sessions.
4. **Edge WAF Protection:** The OpenAppSec ML WAF automatically detects and neutralizes SQL injections, XSS attacks, and automated bot scraping attempts.

7. Troubleshooting, FAQs & Support Escalation

7.1 Frequently Asked Questions (FAQ)

Q: I received a "Too Many Requests" error when generating proposals. What should I do?

A: This is an automated rate-limiting safeguard built into the APISIX API Gateway to protect server capacity. Wait 2 minutes and retry. Rate limits in production are adjusted for high-volume advisor usage.

Q: How long does AI proposal generation take?

A: Complex multi-destination itineraries typically take 60 to 120 seconds as the AI microservice cross-references client preferences, supplier catalogs, and itinerary logic.

Q: Can members see internal advisor notes or commission rates?

A: Absolutely not. The Member Portal is completely isolated. Clients only see published proposals, official invoices, uploaded documents, and direct chat messages.

Q: A client forgot their Member Portal PIN. How do I reset it?

A: Navigate to **Member Portal Admin** (`/member-management``), find the client's row, and click *"Resend PIN Reset Invitation"*. The client will receive an email link to set a new PIN.

Q: Where do WhatsApp client messages land?

A: All WhatsApp interactions appear simultaneously in the **WhatsApp Hub** (`/whatsapp``) and the **Unified Inbox** (`/inbox``) with pre-triaged AI draft replies ready for review.

7.2 System Diagnostic Commands (For Technical Administrators)

```
# Check application status & Docker container health
docker-compose ps

# Inspect portal backend logs
docker-compose logs -f lanai-portal

# Inspect AI Gateway & Ollama LLM service logs
docker-compose logs -f lanai-ai

# Force-trigger Twenty CRM synchronization health check
curl -X POST http://localhost:3001/api/crm-sync/trigger
```

7.3 Technical Support & Escalation Contacts

Support Level	Contact / Channel	Coverage Hours
Advisor Operational Support	support@lanai.example.com	24/7 Concierge Support Desk
Platform Technical Lead	admin@lanai.example.com	Mon–Fri 08:00 – 20:00 EST
Emergency Infrastructure Escalation	Internal Ops Pager System	24/7/365 Critical Escalation
