MEMBER PORTAL

WHY IT EXISTS

Your business competes on relationships. Fragmentation erodes them.

Today the work spreads across email, messaging, spreadsheets, and memory. That creates four risks we are solving.

Context is lost

Preferences, trips, and history scatter.

Advisors buried in admin

Searching, redrafting, sorting by hand.

Inconsistent service

Every advisor works differently.

Reactive, not anticipatory

A CRM only records the past.

The risk is not moving too fast. It is standing still while competitors automate the relationship.

HOW IT CREATES VALUE

Five ways Lanai creates value for your business.

Connected data and AI assistance, turned into measurable outcomes across your client relationships.

Advisor productivity

Less admin, more relationship.

Retention and LTV

Churn signals and next-trip prompts.

Operational visibility

Pipeline, capacity, revenue in one picture.

Faster proposals

An intelligent first draft, not a blank page.

Premium experience

A private portal that feels exclusive.

HOW IT WORKS

Your advisor, augmented at every step.

AI supports your advisor where it creates the most value, while your advisor retains judgement and the relationship.

Private by design
Local AI models. Your client data stays within your infrastructure.

A model that grows with your business.

Lanai supports tiered membership with clear entitlements and recurring revenue, so your service scales with your clients.
